

XM radio offers a Premium service to its PAYING customers with its local traffic and weather. This information can help plan a day or avoid an inconvenience. These are just a few of the benefits of XM radio. By PAYING for the service, subscribers are free to listen to what they desire. Not the single, commercial-laden choice of an NAB radio station. In short, this argument is about Freedom of Speech. XM has the right to inform its PAYING customers of news and local weather. We as consumers have the right to PAY for the services offered by XM radio.
